

Welcome to IEEE Computational Intelligence Magazine!

This new IEEE publication is the most recent achievement of the Computational Intelligence Society. With this magazine, we aim to provide a reference channel for disseminating computational intelligence technologies, applications, awareness and knowledge, as well as information about our Society's life. We strive, in fact, to serve and support scientists, professionals, entrepreneurs, government employees, policy and decision makers, educators, students and all people who are working in our scientific and technological field or who are interested in considering and using computational intelligence technologies for their specific applications.

In this magazine, we will publish introductory and tutorial papers to make our basic expertise available to everyone, including people who are not experts in our field. Examples and real-world applications will be presented to create a sense of the usability of our approaches and possible impacts on industry, economy, environment, society and daily life. Tutorials on advanced topics will be included to provide hints and information about theoretical and applied research, as well as innovative application directions. Ideas about emerging technologies and applications will be presented to stimulate interest and discussion.

Participation in the Society's life will also be promoted by reporting activities and achievements in committees and chapters, as well as awards, news and more. In fact, we would like to locate and recognize volunteers, their efforts and dedication for the advancement of science, technologies, economy, environment and society, as well as specifically for the IEEE Computational Intelligence Society.

This magazine is a collective effort of many people in our Society and in the IEEE. On behalf of the Computational Intelligence Society and the IEEE, I would like to take this opportunity to thank each and every one of them for their cooperation and enthusiasm. In particular, we are greatly indebted to Gary Yen for making our dreams about this magazine a reality, and to Jacek Zurada and Jim Keller for promoting the process of establishing this publication.

We hope this new publication will be useful to each of you. Please do not hesitate to provide comments, criticisms and suggestions to continuously enhance it and serve you better. You are also invited to contribute to this publication, as well as to volunteer in our Society, according to your interests and expertise.

If you are interested in computational intelligence, then the IEEE Computational Intelligence Society is your home and we will strive to make this publication your favorite magazine!

Enjoy reading this inaugural issue and stay with us!

CIS Executive Officers

*President, Vincenzo Piuri,
University of Milan, ITALY*

*Past President, Jacek M. Zurada,
University of Louisville, USA*

*Vice President – Finances,
Piero P. Bonissone, General Electric Co.,
USA*

*Vice President – Conferences,
Garrison Greenwood, Portland State
University, USA*

*Vice President – Members Activities,
David B. Fogel, Natural Selection,
Inc., USA*

*Vice President – Publications, Jim Keller,
University of Missouri–Columbia, USA*

*Vice President – Technical Activities,
Lipo Wang, Nanyang Technological
University, SINGAPORE*

*Division X Director,
Evangelia Micheli-Tzanakou,
Rutgers University, USA*

Publication Editors

*IEEE Transactions on Neural Networks,
Marios Polycarpou, University of Cyprus,
CYPRUS*

*IEEE Transactions on Fuzzy Systems,
Nikhil R. Pal, Indian Statistical Institute,
INDIA*

*IEEE Transactions on Evolutionary
Computation, Xin Yao,
University of Birmingham, UK*

Administrative Committee

Term ending in 2006:

*Bernadette Bouchon-Meunier, Pierre and
Marie Curie University, FRANCE*

Gary B. Fogel, Natural Selection, Inc., USA

*Jerry Mendel, University of Southern
California, USA*

*Witold Pedrycz, University of Alberta,
CANADA*

Bernard Widrow, Stanford University, USA

Term ending in 2007:

*Laszlo Koczy, Technical University of
Budapest, HUNGARY*

*George G. Lendaris, Portland State
University, USA*

Robert J. Marks, Baylor University, USA

Jennie Si, Arizona State University, USA

*Paul Werbos, National Science
Foundation, USA*

Term ending in 2008:

*James Bezdek, University of
West Florida, USA*

*Fahmida Chowdhury, University of
Louisiana at Lafayette, USA*

Toshi Fukuda, Nagoya University, JAPAN

*Derong Liu, University of Illinois,
Chicago, USA*

Enrique Ruspini, SRI International, USA
